Forum LABO PARIS 2021

The response to the issues and challenges of the Laboratory community

The 16th Parisian edition of **Forum LABO**, the CIFL event organized by Reed Expositions, will take place from **October 5 to 7, 2021** at **PARIS** expo Porte de Versailles.

Forum LABO PARIS will provide an **answer to the issues, to the new technological and organizational challenges** facing the entire Laboratory community. The experience has been redesigned to meet the needs for **solutions** in terms of products, services and scientific content for digitization, technological performance, laboratory safety, laboratory layout, research development or the creation of value, the use of big data, more “responsible” practices.

Forum LABO PARIS brings together professionals and the best specialists in the fields of **research, analysis and control** for all sectors of activity (Academic research, Pharmacy, Biotech, Chemistry, Agro-food (mainly safety and control), Cosmetics, Environment, etc.).

The Covid has damaged human relations, leaving your home or office becomes a necessary valve to gain professional quality. Taking advantage of a **privileged moment of exchange and sharing of experiences with the entire laboratory community**, around training courses and scientific conferences, once again opens the doors closed by the pandemic.

Forum LABO PARIS mettra en avant les grandes avancées scientifiques dans sa **programmation**. Robotisation, spectrométrie de masse, caractérisation, RMN, couplage, toxicologie, métabolomique, fluxomique, protéomique, rhéologie, métrologie ... autant de technologies qui seront abordées par pas moins de 15 sociétés savantes.

Forum LABO PARIS will highlight the major scientific advances in its **programming**. Robotization, mass spectrometry, characterization, NMR, coupling, toxicology, metabolomics, fluxomics, proteomics, rheology, metrology... so many technologies that will be addressed by no less than 15 learned societies.

A taste of the topics covered: the digital revolution with the laboratory of the future, the emergence of SARMs, the problem of cannabinoids, doping and its legal issues, neonicotinoids and other endocrine disruptors, the state of knowledge concerning the diagnosis virological in the context of the Covid-19 crisis ...

Societal issues are also on the program of the conferences, with the prospective of the laboratory market in France, career management and the development of professions.

At the same time, the 14th French-speaking Congress on Separation Sciences and Couplings - SEP 2021 - of AFSEP will be held on the diversity of separation techniques both from a theoretical and application point of view, as well as for the exchange of experiences.

As always, innovation will be in the spotlight with more than 150 new products expected. Significant emphasis will be placed on Lab'Meetings, qualified and targeted business meetings, real accelerators for the realization of projects and business, essential in the current context.

Mark this next meeting in your calendars!
